

KONICA MINOLTA

WORKPLACE
OF THE FUTURE™

Meet ALICE: Friendly. Professional. And Completely Virtual.

virtual receptionist

Interact. Meet ALICE Receptionist. Your new receptionist. She greets and interacts with visitors when they enter your lobby. But ALICE is different—she’s a virtual visitor management system like no other. ALICE uses a touch screen and live video technology to directly connect visitors with your employees, greeting them and notifying staff when a visitor enters your office space. Much more than a computerized receptionist, ALICE ensures you’re providing a consistent customer service experience for guests and improved security for your office—while saving money by forgoing a full-time staff member to manage your front desk.

ALICE is just one of the ways Konica Minolta is reshaping the Workplace of the Future™, helping you work smarter, more productively, and more collaboratively. Giving shape to ideas that will reinvent the way organizations work today—and tomorrow.

In Business, You Only Get One Chance to Make a First Impression. ALICE Makes Sure It's a Good One.

As the leader in Virtual Receptionist technology, ALICE Receptionist is committed to offering the most innovative, feature rich product, whether you're managing multiple buildings or single office location. Businesses and government agencies of any size will benefit from:

Visitor Management

- Visitor check-in/check-out
- Employee notification of visitors arrival
- Visitor badges

Security

- Video communications with visitors
- Active visitor reports (who's currently in the building)
- Capture visitor images

Interactive Information

- Building events calendar
- Maps
- Custom HTML pages

Visitor and Employee Communications

- 2-way or 1-way video communications
- Integration with all major VoIP SIP enabled phone systems
- Integration with Microsoft Skype for Business and Microsoft Lync

Choose from Self-Service or Operator Mode

ALICE works the way your company does, providing flexibility for you and your employees. Self-Service Mode allows visitors to find and connect with employees via a directory, simply by touching the screen. Operator Mode requires the company to designate an employee (Operator) to manage the lobby. ALICE detects when a visitor arrives and immediately notifies the designated Operator—no matter where they may be.

ALICE is Just One Way Konica Minolta is Changing the Shape of Tomorrow's Workplace.

As work becomes less about a place you go, and more about what you get done, Konica Minolta brings you the Workplace of the Future, a growing portfolio of unified smart office solutions that allows your team to work smarter, more productively, and more collaboratively from anywhere, at anytime.

For more information on ALICE Receptionist or Konica Minolta's Workplace of the Future, please contact your local sales representative.

KONICA MINOLTA

WORKPLACE
OF THE FUTURE™

Simplify Scheduling, One Meeting at a Time.

meeting place optimization

Collaboration.

Making a school more productive and efficient is the goal of every institution. Yet today, institutions spend 35% to 50% of time talking through projects rather than working on them. Meets are multiplying—yet available meeting space is in high demand.

Teem makes meetings more productive by helping connect people with the right meetings rooms and resources, keeping meetings on track and streamlining how faculty/administrators schedule and conduct meetings. Beyond that, Teem generates analytical data and provides recommendations for improving your company's meeting behavior.

Teem provides scheduling for private study meetings on campus, at the library or in the school district. It's just one of the ways Konica Minolta is reshaping the Workplace of the Future™, helping you work smarter, more productively and collaboratively. Giving shape to ideas that connect people with the tools and resources they need to live and work better.

¹fortune.com/2015/11/11/eventboard-meeting-management

teem
Formerly EB eventboard

Teem Helps Your Institution Work Better Together, Creating a More Productive Environment.

Teem is a powerful, cloud-based platform that improves how meetings are planned and executed—while revealing trends and patterns about how institutions meet and collaborate. How? By offering two sets of features:

Faculty Meeting Tools

That connect your people with the right resources for meetings when and where they need them.

- Eye-catching conference room displays show room availability at a glance and accept ad hoc bookings right from the display
- Mobile booking allows faculty to search for the best meeting room and resources for their needs, then book the meeting right from their phone

Activity Driven Insights

That dig deep into your facilities' meeting and space use behaviors, giving you answers to questions about how your people, places and technology interact, such as:

- Find out which rooms are under or over-utilized
- Discover how often meetings are canceled
- See if you need to expand, consolidate or repurpose current space or plan new spaces
- Calculate how much meetings are costing your institution

Teem is the Secret Weapon for a Better Institution

- Runs on affordable, readily available hardware (iPads® / Android®)
- Syncs with popular calendar systems such as Microsoft Exchange, Office 365, Outlook and Google
- It's easy to implement and scale up across buildings, floors and campuses
- Strict security policies include incident response management procedures, user access control, SSL data transport, data encryption and routine pen tests

iPad is a registered trademarks of Apple Inc., registered in the U.S. and other countries. Android is a trademark of Google Inc.

Teem is Just One Way Konica Minolta is Changing the Shape of the Workplace of the Future.

WORKPLACE
OF THE FUTURE™

Meet Double® 2. Be There When You Can't Be There.

telepresence robot

Collaborate. Imagine having a Double. One that allows you to live in New York, yet work in San Francisco every day. Teach a class in London while living in Miami or allowing a doctor to do rounds remotely. That's the power of Double® 2, the world's leading telepresence robot. Much more than videoconferencing, Double 2 gives you a real, physical presence at work or school via a two-wheeled balancing robot with an attached iPad®. See and be seen. Hear and be heard. This game-changing technology allows you to do more—giving users the freedom to move around an office, classroom or hospital—even though they're not there.

Double 2 is just one of the ways Konica Minolta is redefining the Workplace of the Future™, helping you work smarter, more productively and collaboratively. Giving shape to ideas that will reinvent the future of work, education, healthcare and the world we live in.

iPhone and iPad are registered trademarks of Apple Inc., registered in the U.S. and other countries.

 **Double Robotics**

Shown with Optional Camera and Audio Kits.

More Immersive and Personal. Collaborative. And a Lot of Fun to Use.

Double 2 is best described as an iPad® on wheels. And it's that simple to use as well. Weighing only 15 pounds, a user attaches an iPad to the Double unit. Then, the remote user uses an iPad, iPhone® or web browser to control and drive the robot. Special features include:

- Height can be adjusted remotely, so you can stay at eye level
- Lateral Stability Control (LSC) allows you to maintain lateral stability while traversing common office or classroom obstacles, such as cords, thresholds between rooms, etc.
- Power Drive enables Double 2 to go 80% faster, particularly useful if the driver needs to go a long distance
- Camera Kit (optional) with a 150 degree wide-angle lens that increases the field of view by 70% on each side and allows users to take 5 megapixel photos
- Audio Kit (optional) accessory amplifies speaker and directional microphone—great for noisy and large environments
- Charging Dock (optional) ensures your Double 2 is always online and available for use

Benefits That Free You From Physical Boundaries

For the office ...

- Hire the most knowledgeable workers, no matter where they live
- Retain your best employees, even when they move
- Remote workers stay in the loop on day-to-day activities and ad-hoc communications

For education ...

- Build hybrid classrooms with online and in-person students
- Allow professors to continue teaching from out-of-state
- Enable homebound or hospitalized students to join the classroom

KONICA MINOLTA

WORKPLACE
OF THE FUTURE™

Double® 2. Be in The Classroom. Even When You're Not.

telepresence robot

Connect. Imagine having a Double. One that allows you to teach a class in London—while living in D.C. Or enables a homebound student to be in the classroom even when they physically can't be there. Allowing them to interact with friends and teachers, even ask questions as if they were actually there. That's the power of Double® 2, the world's leading telepresence robot. Much more than videoconferencing, Double 2 gives you a real, physical presence at school via a two-wheeled balancing robot with an attached iPad®. See and be seen. Hear and be heard. This game-changing technology gives you the freedom to move around the classroom even though you're not there.

Double 2 is just one of the ways Konica Minolta is redefining the Classroom of the Future, helping you work smarter, more productively and collaboratively. Giving shape to ideas that are reinventing the future of education from K-12 through higher education. And transforming the world we live in.

iPhone and iPad are registered trademarks of Apple Inc., registered in the U.S. and other countries.

KONICA MINOLTA

WORKPLACE
OF THE FUTURE™

Reach Your Patients. Even When They Can't Reach You.

telehealth

Connected Care. Telehealth is not just the future of medicine—it's happening today. Virtual Care Management powered by SnapMD® from Konica Minolta is at the leading edge of telemedicine technology. Our cloud-based Virtual Care Management (VCM) telehealth platform allows providers to extend their reach of patient care through nearly any web-enabled computer, tablet or smartphone. By introducing technology to close the gap in care access, Konica Minolta is building bridges between providers, patients and the care team and enabling improved and connected care.

VCM is just one of the ways Konica Minolta is reshaping the Workplace of the Future™, helping you work smarter, more productively and collaborate in ways previously unimagined. Giving shape to ideas that will help you connect with your patients virtually anytime, anyplace and deliver the highest quality of patient care.

Giving Shape to Ideas

Robust. Cloud-Based. And Designed to Work for Your Organization.

Our VCM technology is “private label”, meaning that your brand is presented on the user interface. Our focus is on the platform. We believe telehealth should be driven by you and your trusted relationship with your patients. That way this powerful tool becomes an extension of your brand.

Both HIPAA and HITECH compliant, the SnapMD VCM platform is cloud-based and technology agnostic—the ideal partner in this age of Bring Your Own Device. It has a powerful integration architecture that allows for direct data integration. It not only scales with your growing business—but also with clinical requirements. What’s more, it’s elegant and simple design makes it easy for you and your patients to use.

SnapMD: A Complete Virtual Point of Care

Best-of-Breed, Enterprise-Level, Private Label, Multi-Department

-  Cloud-Based Software as a Service
-  Device Agnostic—BYOD Diagnostic Devices Enabled
-  HIPAA and HITECH Compliant
-  Follows Existing Physician Workflow
-  Individual and Family Accounts
-  On-Demand and Scheduled Appointments / Powerful Scheduling System
-  3 Unique Interfaces: Patient / Physician / Administration

As One of the Collaborative Solutions Behind Workplace of the Future, SnapMD Allows You to Care for Your Patients. Virtually.

As work becomes less about a place you go, and more about what you get done, Konica Minolta brings you the Workplace of the Future, a growing portfolio of unified smart office solutions that allow you to work efficiently, productively, and collaboratively from anywhere, at anytime.

For more information on Virtual Care Management powered by SnapMD from Konica Minolta or Konica Minolta’s Workplace of the Future, please contact your local sales representative.
