Privacy

Overview

The Privacy service allows users to exclude themselves from the group and directory listings visible to other users. Exceptions can also be applied to that only a select group of users can monitor phone status.

Feature Prerequisites

- Stand Alone Voicemail, Business Line, Basic Seat, or Premium Seat service pack

Feature Setup

1. Go to the group admin dashboard.

2. Select the user or service on which you want to enable Privacy.

3. Click **Service Settings** in the left column navigation.
