

## THE FINAL FRONTIER

### CFBT Launches Unified Communication Services

For the longest time, our story was simple. We're an office technology provider... except for phones. Even getting to that point was a big leap from our foundation as a Florida Monthly Hardware Distributor.

But as with all the other services we've added in the past, our customers had a demand that needed to be filled, adding the final piece of the puzzle for their office technology to be under a simplified, single provider.

That's why we are pleased to announce the addition of "voice" to our list of services and technology through "Managed Voice." With Managed Voice, you'll experience unified communications technology that provides one centralized platform for simplified billing and support. What's more, Managed Voice is engineered to deliver the highest quality of voice service and cloud-based unified communications.

This phone system will come with the same single point of contact, billing and tech in-class support you're become familiar with.
